

What is the iShares energy storage & materials ETF?

The iShares Energy Storage & Materials ETF (the "Fund") seeks to track the investment results of an index composed of U.S. and non-U.S. companies involved in energy storage solutions aiming to support the transition to a low-carbon economy, including hydrogen, fuel cells and batteries.

Is energy storage a good investment?

Energy storage is an attractive emerging high-growth sector. It's still wide open with many upcoming companies. The market has seen more pure energy storage players coming online with different technologies. These are often high-risk, high-reward investments. ESS (energy storage solutions) offers a compelling new segment in renewable energy.

What are the future opportunities for energy storage?

Energy storage is a fast-emerging sector. Pumped hydro is the most used solution for now. Batteries are the next step to support renewable energy. Lithium technologies lead the way, but many upcoming technologies have different benefits. I provide an overview of possible opportunities.

Which energy storage stocks are a good investment?

Albemarle is the top holding, followed by Tesla, so if you can't decide from the previous stocks, this fund is a good one-stop investment to play the pending energy storage boom. With more than \$1 billion under management and about 60 components, this First Trust fund is another interesting and diversified way to play energy storage.

Should governments invest in green energy?

The IEA forecast suggests that governments and other entities need to significantly boost their investments in clean energy such as wind, solar, hydrogen, battery storage, and electric vehicles (EVs). As a result, companies focused on green energy should prosper as more investment flows into the sector over the coming years.

What is a solar energy fund & how does it work?

The fund holds companies involved with solar energy, EVs, geothermal energy, energy storage, wind energy, and climate tech. It offers some diversification across sectors (industrials at 45%, consumer discretionary at 18%, IT at 15%, materials at 13%, utilities at 7%, energy at 1%, and financials at 1%).
