

How to install the water guide clamp of photovoltaic panels

Where should clamps be connected to the PV module?

When the mechanical load pressure is $\leq 2400\text{Pa}$, Clamps should be connected to the module between 400 and 500mm from the edge of the module. This distance is from the module edge to the middle of the clamp.

*NOTE: We need two or three support rails below the PV module to make sure the module have a good mechanical load performance.

What is the clamp size for a PV module?

For framed PV module, the clamp must overlap the module frame at least 8 mm (0.32 inch) but no more than 11 mm (0.43 inch). The cross section of clamp can be adjusted if the module is securely fastened. For frameless PV module, the clamp must overlap the module frame at maximum 15 mm (0.59 inch).

How do I install a double glass PV module?

Insert the PV module into the clamp, and make sure the module edge touch to the EPDM closely and then tighten the nut with uniform torque values using a qualified torque wrench to ensure the double glass module is firmly secured. Trina suggests using M8 bolts to affix the double glass modules onto the clamp.

How to install a PV module?

Remove the bottom connector parts. Connector parts : M8 Nut ?spring washer and washer. Put the clamp bolts into the installation holes, and then tighten the nuts. Insert the PV module into the clamp, and then tighten the nut. M8 ss304(16N \times m~20N \times m) Insert clamp into the connector racking.

How to install a solar panel?

The first step is to attach the fixing bracket to the solar panel. Lay the solar panel face-down on the tarp or canvas to protect the photovoltaic surface. You want to be sure the mounting holes on the back of the panel align with the holes in the fixing bracket. Don't modify the module frame because doing so may void your manufacturer's warranty.

How do you mount a solar panel?

Seal the deal with module clamps. Clamp your solar panels on the mounting rails to create a single, solid system that can endure the harshest weather conditions. See also: Ground Mount Solar Panels (Advantages)
