Should I install solar panels on my roof?

It's important to consider the pros and cons of solar panels on your roof before you decide if a solar panel installation is right for you. Solar panels offer a compelling mix of environmental benefits and financial incentives. However, the initial costs and practical concerns merit consideration.

Should you buy or lease a solar panel?

Choosing the right solar panel financing option will make going solar more affordable and extend your long-term benefits. A solar lease can help you avoid hefty upfront installation costs and enable you to benefit from energy savings sooner. However, it can also negatively impact solar incentive savings and home value.

Are solar panels a good investment?

Solar installations can come at a pretty high price. While buying solar panels gives you the best return on investment, not everyone has the cash on hand to cover the upfront costs of going solar. Luckily, homeowners can take advantage of financing options, like solar leases and solar loans, to help them afford to make the switch to solar.

Do solar panels need a slanted roof?

You have to position solar panels properly to achieve the highest energy production. The optimal orientation and angle usually require a slanted roof that faces the sun. Some roofs have a unique shape that might not accommodate rigid, flat panels. For those homes, flexible solar panels can be a good workaround.
