Are solar panels a good fit for your farm?

Solar panels can increase your operation's profitability. One government grant program for solar panels on farms is called the Rural Energy for America Program (REAP). Why solar energy may be a good fit for your farmers and ranchers Tips and funding opportunities for solar projects on your farm

Should farmers build solar panels on agricultural land?

But thanks to years of research, farmers and developers have learned to coordinate their efforts to benefit both parties. It may involve building solar panel arrays about 8 feet off the ground to allow space for crop growth and farm equipment. As of the end of 2022, less than 2% of solar energy projects are on agricultural land.

Can solar PV be installed on farms?

ffordable to install on farms. Solar PV installed within an agricultural setting may fall into any of the three common classifications, depending on its system capacity. In this document, 'agricultural solar' or 'farm solar' refer to smaller system sizes or capacities similar to r

Should agrivoltaic planners put solar over a farm?

Or farm first, and put solar over it?" If farming is the main priority, she says, then the solar panels may need to be spaced farther apart and possibly be raised higher. Such changes could potentially limit how much electricity those farm fields generate. And agrivoltaic planners may need to treat the soil, Macknick says.

Can solar panels be used on farms?

Installing solar panels on farms helps solve another major problem: finding the space to collect enough sunlight to produce a bounty of electricity. Farmers can help by sharing their land, says Jordan Macknick. An environmental scientist, he works at the National Renewable Energy Laboratory, or NREL. It's in Golden, Colo.

How can farmers benefit from solar energy?

Farmers can benefit from solar energy in several ways--by leasing farmland for solar; installing a solar system on a house, barn, or other building; or through agrivoltaics. Agrivoltaics is defined as agriculture, such as crop production, livestock grazing, and pollinator habitat, located underneath solar panels and/or between rows of solar panels.

While producers may have barn roofs or spare acreage to install solar panels, there are pros and cons to ground- and roof-installed panels. Roof panels are out of the way, but not all roofs are oriented in the right direction ...
