

Solar outdoor monitoring bracket installation

How do I install and Configure my Blink solar panel mount?

The following easy steps explain how to install and configure your Blink Solar Panel Mount. You must first have a fully functional Blink Outdoor (3rd Gen) camera set up in your Blink account, before attaching the camera to the mount. In addition, the lithium batteries must remain in your outdoor camera before connecting it to the solar panel mount.

Can I use a solar panel mount with a blink outdoor camera?

No, the Solar Mount can only be used with Blink Outdoor (3rd Gen) cameras. Other Blink outdoor cameras (Outdoor 4, XT or XT2) are NOT compatible with its Micro-USB connector to provide a weather resistant seal. Does my Blink Outdoor (3rd Gen) camera have full functionality when powered by the Solar Panel Mount?

Where should a solar panel mount be installed?

The Solar Panel Mount can be mounted on various surfaces including siding, stone, and wood. It can be installed in both wall and eave orientations. Wherever the solar panel is mounted, it is important to place your Solar Panel Mount in south facing direction to receive optimal sunlight and maintain its charge.

What is the blink solar panel mount?

The Blink Solar Panel Mount is a wireless solar panel charging accessory that uses sunlight to power the Blink Outdoor (3rd Gen) Camera (Outdoor 4, XT and XT2 not supported). How does the Blink Solar Panel Mount work? First remove the pull-tab in the battery compartment to activate the battery.

How does a solar panel mount work?

The tabs on the mounting plate insert into the slots on the back of the Solar Panel Mount and are secured by pushing them down into place. When you have the unit mounted in an optimal location, the solar panel and camera can be adjusted at different angles and rotated as needed.

Can a solar panel mount charge a camera?

Yes, as long as your camera receives adequate power from the Solar Panel Mount it will have full functionality, exactly the same as when it's powered by the camera's 2 AA 1.5 volt batteries. It is important; however, to keep functional batteries in your camera, in case your solar panel battery has no charge.
